PROFESSIONAL SUMMARY

Mortgage-technology analyst with 15+ years using T-SQL to query, validate, map, and report on loan and servicing data. Partner with business stakeholders, product, and development to gather requirements, document the work, run QA / UAT testing, and deliver data and configuration changes through production. Active every day in QA testing, technical documentation, and vibe coding with Cursor and AI agents to write SQL, scripts, tests, and docs faster without dropping production standards.

TECHNICAL KNOWLEDGE

- **Data & SQL:** SSMS (T-Sql); ad-hoc reporting; stored procedures; SSIS data-load jobs; data mapping; data validation; XML; Microsoft Excel, Word, Outlook, PowerPoint.
- **QA testing:** UAT and lower-environment testing; Prod/UAT sign off; defect vs. training triage; test-loan loads; data-quality checks across DEV / QA / UAT / PROD.
- **Documenting:** Requirements gathering; Visio Flow diagrams; Technical Documents; SOW's / RFW's / work orders; Config Sheets; SharePoint; User Stories.
- **Vibe coding / AI:** Cursor and AI agents for SQL, scripts, QA checks, and documentation; Visual Studio 2022; VS Code; Python (data extraction).
- **Platforms:** Loan Sphere / MSP / Invoice Management (ICE Mortgage FKA Black Knight); Process Transfer Tool / Configuration Loading Tools / Loan Drop Tools / Mortgage Web Software; Service Now, Azure, TFS.

PROFESSIONAL EXPERIENCE

Technical Analyst/Senior Business Analyst

Feb 2022 - Present

ICE Mortgage Technology (Fka: Black Knight Inc.)

- Partner with clients, BA's and Developers to gather and document business and data requirements; translate needs into configuration, coding, and data changes and stay with each request through implementation.
- Write T-SQL to research production issues, validate data across environments, produce Ad hoc reports, and create scripts plus Change Orders / work orders for DBA execution.
- Perform QA testing with the QA team and client before Prod/UAT sign off; exercise the change, confirm data and configs, and stay with the request through release.
- Document the work end to end — Visio Flow diagrams, Technical Documents, SOW's, change/work orders, and User Stories — so business rules, data, and code are clear for sign off.
- Research Prod issues/incident tickets (via Service Now) with SQL, Visual Studio, and the Web App; identify solutions and advise Client Support of findings.
- Vibe code with Cursor and AI agents (plus VS Code) as a daily practice to write SQL, scripts, QA checks, and documentation faster while keeping production standards.

IT Business Systems Analyst III

June 2012 – 2022

Black Knight Financial Services (Fka: LPSVCS/Lender Processing Services), Jacksonville, FL

- Dedicated support for Wells Fargo on LoanSphere BK/FC/FCR/IM and mappings for MSP (Mortgage Servicing Platform).
- Gathered client requirements and implemented configuration and data-mapping changes across six environments (UAT, QA1, QA2, DEV, PA, and PROD); verified data landed in the correct environment before release.
- Wrote T-SQL (Insert/Update/Delete) Mapping Scripts, Attorney Updates, and Dynamic Zip codes; submitted tickets for DBA's to Execute and tracked through all Environments.
- Wrote AdHoc's for Client/Team via SQL; queried different environments to validate Configurations and find data anomalies, including XML errors.
- Created and sent SOW's to Sr. Mgmt. for sign off before implementing to Prod; attached RFW's, SOW's, and Config Sheets to TFS / Service Desk tickets.
- Updated SharePoint with Current Configurations pulled from Production for Client and Teams.
- Ran QA / UAT testing with the Client (load loans for testing, config checks) before production sign off; mentored Junior associates and provided backup for Manager when out.

Product Support / Data Analyst

February 2011 – June 2012

DMEautomotive, Jacksonville, FL

- Support for The Goodyear Tire and Rubber Co. to facilitate the rollout of their Point of Sale Incentive program across U.S and Canada; worked with POS vendors and Goodyear to get customer data into the application.
- Provide Ad-Hoc reports for Goodyear and their customers using T-SQL; load data into SQL Server and run stored procedures to add or remove records.
- Check data load jobs daily and SSIS tasks; trouble shoot failures with T-SQL and fix errors so loads complete as quick as possible.

March 2008 – February 2011

Lead Support Developer / Analytical Development for LoanSphere

Lender Processing Services Default Solutions / LPSDS, Jacksonville, FL

- Use T-SQL daily to write scripts, return data for reports, and make changes to the Desktop App (Foreclosures, Bankruptcies) which supports thousands of end-users. Follow the process until completion.
- Create new Processes, Holds, Issues, Events, Data Forms and Close reasons for LoanSphere; document the change and contact clients to ensure the proper data has been given and business needs are met.
- QA-tested issues reported by clients to identify if the issue is a software defect or if the user needs training; provide Ad-Hoc reports via Excel and work tickets until complete.

September 2006 – March 2008

IT / Desktop Support / Jr. Network Associate

Lender Processing Services / Fidelity Process Management, Jacksonville, FL

- Support 300+ users and Fidelity's Process Management application (attorney foreclosure/bankruptcy loans) with over 5,000 users; identify if a reported issue is a software defect or if the user needs training.
- Provide detailed specifications when reporting a software defect by entering a development ticket; document the defect and the specification needed for the enhancement.

EDUCATION AND CERTIFICATIONS

- Database course — Florida State College at Jacksonville (formerly FCCJ South).
- Python for data extraction (in progress). Cursor and AI-agent development (vibe coding).
- MCP (Microsoft Certified Professional) — May 2000. A+ — February 2006. N+ — April 17, 2006.
- Network + Security Course, Jacksonville, FL.
